## NATIONAL UNIVERSITY OF COMPUTER AND EMERGING SCIENCES LAHORE CAMPUS

Calculus and Analytical  
according to OBE

Geometry Course Outline

FALL-2020

Course Moderator:

Dr. Akhlaq Ahmad Bhatti

---

CS Department Coordinator:

Dr. Mubasher Baig

---

Department	Department of Computer Science	Dept. Code	CS
Course Title	Calculus and Analytical Geometry	Course Code	MT 101
Pre-requisite(s)	-	Credit Hrs.	3
Moderator	Dr. Akhlaq Ahmed Bhatti.		

# National University

## Of Computer & Emerging Sciences

<b>Course Instructors</b>	Dr. Akhlaq Ahmed Bhatti, Dr. Qaisar Mahmood, Dr. Muhammad Nasir Ali, Mr. Muzamil Hanif, Dr. Noreen Akram, Ms. Kinza Mumtaz, Ms. Quresha Hanif, Ms. Iffat Fayyaz.
<b>Note:</b>	It is a tentative schedule of the course. It may vary (if required).

<b>Course Objective</b>	The course is aimed at acquiring the basic techniques of differentiation and integration of functions of single variable. Stress will be given on the concepts of limit continuity and graphing of functions using derivatives. Students will be encouraged to go through the proofs of important theorems and solve some life problems as well.
-------------------------	--

No.	Assigned Program Learning Outcome (PLO)	Level	Tool
01			

*I = Introduction, R = Reinforcement, E = Evaluation.*

*A = Assignment, Q = Quiz, M = Midterm, F = Final, L = Lab, P = Project, W = Written Report.*

No.	Course Learning Outcome (CLO) Statements	Tools
01	• Solve algebraic equations and inequalities by using properties of absolute values.	Q1, M1
02	• Analyze the function and sketching the curve by using properties horizontal/ vertical and compressing / stretching	Q1, A1, M1
03	• Investigation of continuity through limits analytically / graphically.	A1, M1, F
04	• Apply the concept of differentiation in real life problem	A2, M1, M2, F
05	• Curve sketching using extrema theory	Q2, M2, F
06	• Riemann sum, evaluation of definite & indefinite integral and their applications to compute lengths of curves / area of regions / volume of solids.	M2, Q3, A3, F
07	• Correctly graphs/formulate the equation of line and plane in R3.	F

<b>Course Objective</b>	The course is aimed at acquiring the basic techniques of differentiation and integration of functions of single variable. Stress will be given on the concepts of limit continuity and graphing of functions using derivatives. Students will be encouraged to go through the proofs of important theorems and solve some life problems as well.	

Wee k	Section	Course Contents	Chapter	CLO
01		<b><u>Inequalities</u></b> Rules for inequalities, solving inequalities	From previous edition	1
02	1.1 1.2	<b><u>Functions</u></b> Functions and their graphs: Combining functions; Shifting and Scaling graphs	1	2
03	2.1 2.2 2.3 2.4	<b><u>Limits and Continuity</u></b> Rates of Change and tangents to curves Limit of a function and limit laws The precise definition of a Limit One sided Limit	2	3
04	2.5 2.6	Continuity Limits involving Infinity; Asymptotes of Graphs	2	3
05	3.1  3.2 3.3 3.4 3.5	<b><u>Derivatives</u></b> Tangents and derivatives at a point  The derivatives as a function Differentiation Rules The derivative as a rate of change Derivatives of trigonometric functions	3	4

# National University

## Of Computer & Emerging Sciences

	3.6 3.7 3.8 3.9	The chain rule Implicit differentiation Derivatives of inverse functions and logarithms Inverse trigonometric functions Related rates		
06		<b>MID-TERM-I</b>		
07	4.1 4.2 4.3	<b><u>Application of Derivatives</u></b> Extreme values of functions The Mean value theorem Monotonic functions and the first derivative test	4	5
08	4.4 4.5 4.6	Concavity and Curve sketching Indeterminate forms and L'Hopital's Rule Applied optimization	4	5
09	5.1 5.3	<b><u>Integrals</u></b> Area and estimating with finite sums The definite integral	5	6
10	5.4 5.5 5.6	The Fundamental theorem of calculus Indefinite integrals and the substitution method Definite integral Substitutions and area between the curves	5	6
11	6.1 6.2 6.3	<b><u>Application of Definite Integrals</u></b> Volumes using cross sections Volumes using Cylindrical Shell Arc length	6	6
12		<b>MID-TERM-II</b>		
13	7.1 7.2 7.3	<b><u>Integrals and Transcendental Functions</u></b> The Logarithm defined as an integral Exponential change and separable differential equations Hyperbolic Functions	7	6
14	8.1 8.2 8.3 8.4	<b><u>Techniques of Integration</u></b> Using basic Integration formulas Integration by parts Trigonometric integrals Trigonometric substitution	8	6
15	8.5 8.6 8.8	Integration of rational functions by Partial fractions Reduction formulas Improper integrals	8	6
16		<b><u>Analytical Geometry</u></b> Straight lines in R <sup>3</sup> , Equations for planes.	Reference Book	7
		<b>FINAL EXAM</b>		

### **Evaluation Procedure & Marks Distribution:**

-

# National University

## Of Computer & Emerging Sciences

---

Assessment Tools	Total No. of	Weightage
Quizzes	3	10%
Assignments	3	8 %
Home work	Every week	7%
Mid Term Exam	2 (I+II)	25%
Final Exam	1	50%

**Note:** No homework/ assignment submission after due date.
